Component	Specification	Requirement	
Blower/Heater	5 AMP; 120 V	15 AMP; 120V, separate circuit; Class A GFCI	

1) Where applicable, utilize cut-out templates packed with unit for deck cutouts.

2)  $16 \times 20$  ( $405 \times 510$ ) minimum access required at pump/blower location(s).

Each Symphony air bath is equipped with an air heating system to raise the temperature of the air entering the bath. This air temperature will be lower than the bathing temperature of the water, but will help reduce rapid decrease in water temperature. In addition, the air coming from the air jets will feel cool against the skin. This system does not heat the water.
