		Product photo could vary from the actual product				
	Product No.: 91136605 Single-stage, centrifugal, in-line, single-head pump.					
		The in-line design with opposite suction and discharge ports enables mounting in pipework or on a concrete foundation.				
		The shaft seal is a corrosion resistant maintenance-free mechanical seal.				
		The pump is fitted with a three-phase MLE motor with frequency converter and PI-controller integrated in the motor terminal box. No additional motor protection is required as both motor and electronics are protected by integrated overload and temperature protection.				
		A differential pressure transmitter fitted on the pump registers the differential pressure across the pump and enables constant pressure or proportional pressure control of the pump.				
		A control panel enables setting of required setpoint as well as setting of pump to MIN or MAX operation or to STOP. The control panel has indicator lights for "Operation" and "Fault".				
		Communication with the pump is possible by means of Grundfos R100 Remote Control enabling further settings as well as reading out of a number of parameters such as "Actual value", "Speed", "Power input" and total "Power consumption".				
		The terminal box holds terminals for the connection of :
