- to successfully develop, produce, and sell high quality pumps and pumping systems worldwide, contributing to a better quality of life and healthier environment

Bjerringbro, Denmark

Fresno, California

Olathe, Kansas

Monterrey, Mexico

Allentown, Pennsylvania

Oakville, Ontario, Canada

- One of the largest pump companies in the world with over 11,000 employees worldwide
- · World headquarters in Denmark
- North American headquarters in Kansas City Manufacturing in Fresno, California
- · 60 companies in 40 countries
- · More than 10 million pumps produced annually worldwide
- North American companies operating in USA, Canada and Mexico
- Continuous reinvestment in growth and development enables the company to BE responsible, THINK ahead, and INNOVATE

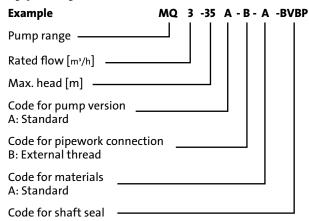

Application

The MQ pump is designed for water supply and pressure boosting ...

- homes
- · cabbins, cottages
- · on farms as well as
- gardens

The pump is suitable for pumping of potable water and rain water.

Type Key

Pumped liquids

Potable water, rain water or other clean, thin, non-aggressive liquids not containing solid particles or fibres.

Operating conditions

System pressure: Max. 109 psi (7.5 bar).

Inlet pressure: Max. 44 psi (3 bar).

Suction lift: Max. 26 ft (8 m).

Liquid temperature: $32^{\circ}F$ to $+95^{\circ}F$ (0°C to $+35^{\circ}C$). Ambient temperature: $32^{\circ}F$ to $+113^{\circ}F$ (0°C to $+45^{\circ}C$).

Technical data

Mains voltage:

115 V models: 1 x 110-120 V, 60 Hz
 230 V models: 1 x 220-240 V, 60 Hz.

Voltage tolerances: −10%/+6%.

Enclosure class: IP54.
Insulation class: B.

Sound pressure level: \leq 55 dB(A). Agency approvals: UL, cUL

Features and benefits

Complete system

The MQ is a complete, all-in-one unit, incorporating pump, motor, diaphragm tank, pressure and flow sensor, controller and check valve.

The controller ensures that the pump starts automatically when water is consumed and stops automatically when the consumption ceases. In addition, the controller protects the pump in case of faults.

Installation

Due to its compact design, the pump does not take up much space and is easy to install. No space around the pump is required.

Simple operation

The pump features a user-friendly control panel with ON/OFF button and indicator lights for indication of the operational state of the pump.

Self-priming pump

As it is self-priming, the MQ is able to pump water from a level below the pump. Provided it is filled with water, the pump is able to lift water from a depth of 26 ft (8 m) in less than 5 minutes. This facilitates installation and start-up of the pump and provides more reliable water supply in installations where there is a risk of dry running and leakages in suction hose or pipes.

• Built-in protective functions

If exposed to dry running, excessive temperature, or any overload condition the pump will stop automatically, thus preventing a motor burnout.

Automatic reset

The pump features an automatic reset function. In case of dry running or similar alarm, the pump will stop. Restarting will be attempted every 30 minutes for a period of 24 hours. The reset function can be deactivated.

· Low noise level

Thanks to its hydraulic design and internal cooling, the pump is very quiet, which makes it suitable for many applications.

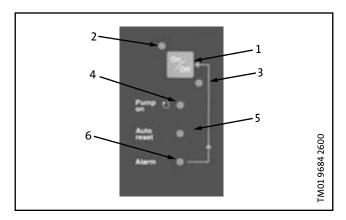

Pressure tank

The built-in pressure tank reduces the number of starts and stops in case of leakages in the pipe system, causing less wear on the pump.

Maintenance

No maintenance of the pump is required.

Control panel operation

| Pos. | Function | Description | |
|------|----------------------------|---|--|
| 1 | ON/OFF button | The Pump is started and stopped by means of the ON/OFF button. | |
| 2 | Dannau in di sakau li abka | Indicates that the pump is ready for operation (green). | |
| 3 | Power indicator lights | Indicates that the pump is on standby (red). | |
| 4 | Pump ON (green) | Indicates that the pump is running. | |
| 5 | Auto reset (green) | Indicates that the auto reset function is active. After an alarm, restarting will be attempted every 30 minutes for a period of 24 hours. | |
| 6 | Alarm (red) | Indicates that the pump is in alarm state. Manual resetting is possible by pressing the ON/OFF button. | |

Product range

| Region | Pump Type | Voltage | Connection |
|----------------------|-----------|-----------------|-------------------|
| USA, Canada & Mexico | MQ 3-35 | 1 x 110 - 120 V | Power Cord w/plug |
| | MQ 3-45 | 1 x 110 - 120 v | Power Cord w/plug |
| | MQ 3-35 | 1 x 220 - 240 V | Power Cord w/plug |
| | MQ 3-45 | 1 x 220 - 240 V | Power Cord w/plug |

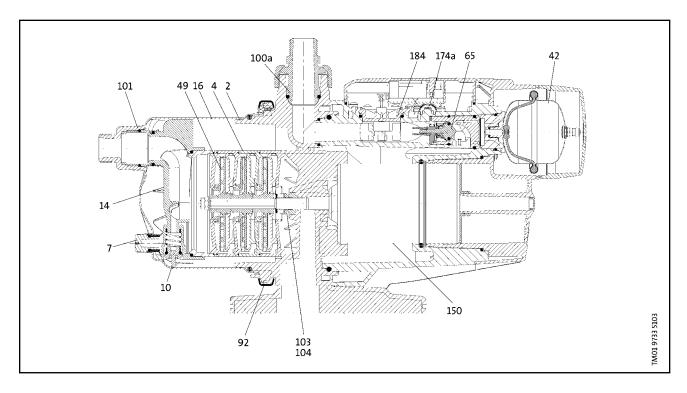

Material specification

| Pos. | Components | Material |
|------------|--|---|
| 2 | Motor stool with base plate | POM + 25% glass fiber |
| 4 | Chamber | PPO + 20% glass fiber |
| 7 | Drain and priming plug | POM + 25% glass fiber |
| 10 | Self-priming valve | PP + 30% glass fiber |
| 14 | Self-priming part | PPE/PS + 20 % glass fiber |
| 16 | Pump sleeve | Stainless steel, DIN WNr. 1.4301, AISI 304 |
| 42 | Pressure tank | Butyl (diaphragm) |
| 49 | Impeller | PPO + 20% glass fiber-PTFE |
| 65 | Non-return valve | POM + 25% glass fiber |
| 92 | Clamp | Stainless steel, DIN WNr 1.4301, AISI 304 |
| 100a | Discharge port | POM + 25% glass fiber |
| 101 | Suction port | POM + 25% glass fiber |
| 103 104 | Shaft seal: Stationary and rotating part | Carbon/ceramics/NBR rubber |
| 150 | Shaft | Stainless steel, DIN WNr 1.4005, AISI 416 |
| 150 | Motor sleeve | Stainless steel, DIN WNr 1.4301, AISI 304 |
| 174a | Pressure switch | |
| 184 | Flow sensor | |
| | O-rings | NBR-rubber |

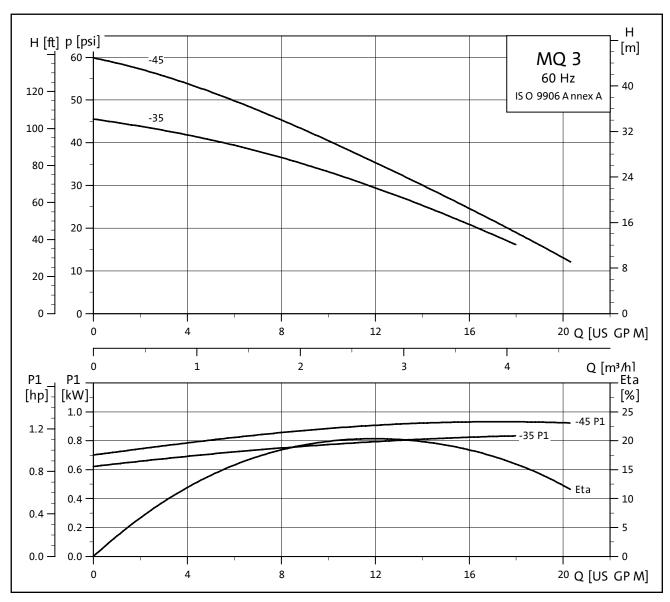

POM: Polyoximetylen NR-rubber: Natural Rubber PPO: Polyphenylene Oxides PP: Polypropylene

PPE/PS: Polyphenylene Oxides (the same as PPO but from different supplier)

NBR-rubber: Nitrile-Butadiene Rubber

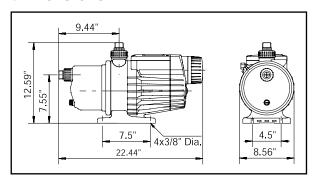

Flooded suction (0 PSI inlet) performance curves*

^{*}See suction lift performance curves (page 8) for installations with water level below intake.
