

# TKO™

## Total Knockout Closet Flange

Patent # 5,377,361

**NEW DESIGN**

Standard and stainless steel swivel ring ABS models

Standard and stainless steel swivel ring PVC models

## Install with Confidence.

### // What Contractors Are Saying About The New TKO //

"I used to get callbacks for clogged drain lines. Many times it was because the knockout from the closet flange went down the line. Since we have been using the TKO, these calls have all been eliminated."

George Braun  
Lescon Plumbing  
Humble, Texas

"We've found the new stainless steel TKO to be a great improvement over regular metal ring closet flanges. The stainless steel ring with a heavy duty knockout that eliminates test plugs, and keeps debris out of the drain line—it's a winner!"

Jerry McCullar  
AMPAM Riggs Plumbing  
Mesa, Arizona

**NEW** Stainless Steel swivel ring is virtually corrosion proof!

Tapered hub O.D. is easier to install into 4" foam core DWV.

# TKO™

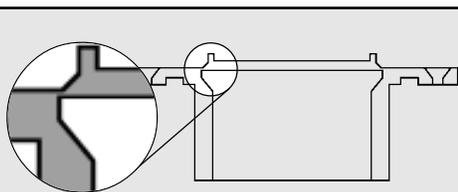

## Total Knockout Closet Flange

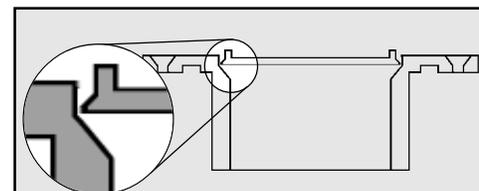

- Always knocks out in one piece. Fewer service calls for shards left in the drain lines.
- Easier installation, no need to hold knockout while hammering.
- Fits perfectly flat on sub-floor. Welds over 3" or inside 4" Sch. 40.
- Holds 2 floors for head test.

Hit the raised rim of the TKO until the knockout cracks loose.

Designed with the knockout across the top making it larger than the drain throat.

Knockout stays in one piece while it drops 1/8"—won't shatter into drain line.

Remove knockout with pliers—it always comes out in one piece!

Item No.	Description	Box Qty.
