# PolyPro®

**Polypropylene venting products for high-efficiency condensing appliance installations. Chloride free, environmentally safe. Listed to ULC-S636.**

# Specifications

## Applications

PolyPro is a polypropylene vent pipe for use with ANSI Category II and IV gas-burning appliances, including high-efficiency water heaters, condensing boilers and warm air furnaces. PolyPro is listed by Intertek to the ULC S636 standard in Canada as a Class IIA, IIB and IIC vent system suitable for exhaust temperatures up to 230°F / 110°C, and a maximum positive pressure of 15 in-w.c.

## Materials and Construction *updated*

Rigid pipe constructed of 2.2mm (minimum) thick polypropylene. Flex is double-wall polypropylene. EPDM or optional Viton Gaskets

## Clearances

0" clearance to combustibles for exhaust temperatures up to 194°F / 90°C, and 0" clearance for vertical installations up to exhaust temperatures of 230°F / 110°C and ¼" / 6mm clearance to combustibles for horizontal installations at exhaust temperatures up to 230°F / 110°C . PolyPro concentric vent system components, including concentric Horizontal Termination and Vertical Termination, are listed at 0" clearance to combustibles for exhaust temperatures up to 230°F / 110°C.

## Diameters

2" (60mm), 3" (80mm), 4" (100mm), 5" (130mm), 6" (150mm), and 8" (200mm).

## Listings

Listed with the appliance in the USA and Canada, check with appliance manufacturer. Intertek / ETL listed to ULC S636 Listed as a Class IIA, IIB, and IIC vent system. Tested and listed by a major testing agency, such as CSA.

PolyPro complies with LEED® credit IEQc4.1 on VOC limits.

PolyPro is approved by the Massachusetts Plumbers Board. Approval code G1-0811-42.

## PolyPro *updated*

PolyPro and PVC/CPVC: PVC pipes are commonly used for venting water heaters, condensing boilers and warm air furnaces, yet PVC was never designed for such use. An environmentally safe and engineered alternative for condensing gas appliances is PolyPro. Engineered for venting, it is 100% recyclable; contains no toxic or carcinogenic materials, chlorides, or heavy metals; and is also easier and faster to install then PVC, saving the contractor time and money. PolyPro does not release hazardous gases during combustion and has been used safely throughout Europe since the early 1990s. Polypropylene has a higher operating temperature limit of 230°F/110°C  (PVC is 149°F/65°C max and CPVC is 194°F/90°C). PolyPro is engineered with a corrosion-free, condensation management system.

## PolyPro Flex

PolyPro Flex through B Vent as a Chase: Retrofit venting for new, high-efficiency appliances. When replacing a mid-efficiency appliance with a new condensing 90+ appliance, you can use the existing B vent (any brand) as a chase for the new appliance with PolyPro. The perfect solution for utilizing the B Vent already in place, use the convenient pull cone to insert double-wall PolyPro Flex through the B Vent pipe and terminate in either a two pipe or single pipe system. At the other end is the unique B Vent/PolyPro Support Cap, allowing for the connection of flex to rigid PolyPro lengths and elbows to finish the installation.

## Terminations

DuraVent's concentric PolyPro vertical terminations are lab tested to handle harsh weather and remain icicle free in freezing temperatures. Air circulation and weather conditions like rain, wind and ice have the potential to reduce the efficiency of a unit's performance and the operation of its venting system.

# PolyPro®

M&G DuraVent is dedicated to one thing: focusing on the design and manufacture of venting products. As experts in this industry, our team is passionate about creating innovative, quality products. We invest in equipment with the latest technology to develop and test venting products that are engineered to one standard: excellence. All measuring equipment is calibrated to the same levels as used by testing agencies and are compliant with ISO 17025, the test-laboratory standard.

## Wind Tunnel Laboratory

The wind tunnel lab allows us to gather precise data with 270 degrees of measurement on terminations. All data is analyzed for product performance under rigorous conditions before going to market.

## Rain Testing

M&G labs test the vapor/moisture barrier of products by subjecting them to extreme rain and wind conditions. These tests are compliant with both the US and Canadian requirements as well as the stringent European standards.

## Climate Testing

M&G labs have developed a patented ice testing system in the climate room. Tests run to -4°F (-20°C). PolyPro vertical terminations are engineered to remain icicle free.

## Commercial and OEM Product Development

M&G DuraVent engineers are expertly skilled to develop venting components to OEM specs. To satisfy specific venting requirements, DuraVent has the experience to provide custom design, prototyping and testing of vent systems and components engineered to the demands of specific appliances.

**Fast**……Lightweight and designed for quick and easy assembly.
**Safe**……….no sharp metal edges.

**Clean**……..no corrosion of metals or chlorides.

**Sustainable**……corrosive condensate resistant and 100% recyclable.
### The PolyPro Commercial Difference

• Available in 5in. (130mm), 6in. (150mm) and 8in. (200mm) diameter.
• Completely smooth inner wall for optimal flow performance.
• Components designed for complete discharge of condensate.
• Design allows for system distance adjustment from the back of the appliance.
• Sizing services available to help in calculating required vent size.
