WARNINGS

FREE CIRCUIT WARNING

There is an open circuit in your grill. Unplug from power source immediately.

LOW FUEL WARNING

Low pellet alarm has been triggered. Please check hopper.

MOTOR WARNING

Auger motor is not working properly. Unplug from power source immediately.

BATTERY WARNING

Low voltage detected on the Davy Crockett Grill. Check power source.

FAN WARNING

One of the fans is not working properly. Discontinue use immediately.

CONNECT VIA iOS

Locating your Grill's WiFi password.

The password can be found on the back of the digital control of WiFi retrofit kits, or will be the serial number on the green plate on the back of the Grill exterior.

Go to "Settings > WiFi" on your iPhone.

Click on WiFi, it's the second icon down.

Make sure your WiFi is on.

When WiFi is enabled, a list of networks will be displayed.

Select the network that begins with "GMG_".

Enter the password for your grill. Press join.

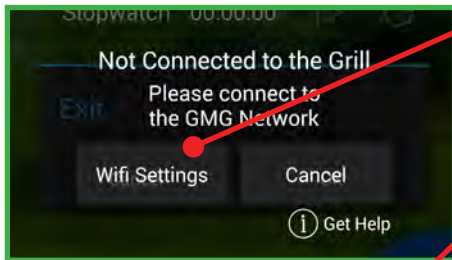

It may take up to 1 minute to connect. Once connected, a check mark will appear.

CONNECT VIA ANDROID

Locating your Grill's WiFi password.

It can be found on the back of the digital control board of retrofit units, or near the serial number plate on grill exterior.

Start the app. Wait for the WiFi pop-up, then press "WiFi settings."

Make sure your WiFi is on.

When WiFi is enabled, a list of networks will be displayed.

Press the network that starts with "GMG_".

Enter the password for your grill. Press connect.

It may take up to 1 minute to connect. Once connected, "Connected" will appear below the network.

HOME SCREEN

The home screen allows you to keep track of all your grilling parameters:

Current Grill Temp.

Current Food Probe Temp.

Stopwatch Elapsed Time

Remaining Time for Timer

User Set Grill Temp.

Current Profile

Current Step

The control screen allows you to turn your grill on/off, set grill temperature, set food probe temperature, set a timer and/or stopwatch.

CONNECTING TO THE GRILL

ON: First, confirm the grill is plugged in and the power switch on the front of the grill is set to "on".

Once the grill has power, ensure your smart phone connects to the grill's WiFi network "GMG_DB_"

With the application launched press the "connect" button to display temps and to control the grill.

To disconnect from the grill press the "connect" button to disconnect the App from the grill.

GRILL ON/OFF

ON: First, make sure you are connected to the grill. Once you verify you have power, turn on the grill by tapping the "Power" button.

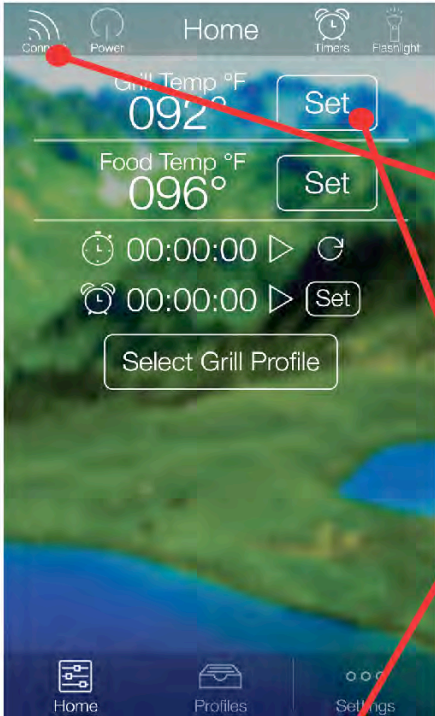

This will start the grill and it will begin 1,2,3 startup sequence.

OFF: Tap the "Power" button icon to turn the grill off. The grill will cycle into "Fan Mode". This will cool-down the firebox and when done the grill will display "Off".

SETTING GRILL TEMP

To set the grill temperature of your GMG make sure you are connected to the grill.

Press the "Set" button next to "Grill Temp".

Move the slider to the desired temperature you would like to set.

Press "Confirm". The Grill will now adjust to the new set temperature.

* Pro Tip: double tap to reveal keyboard screen for precise temperatures.

	0	⌨

FOOD PROBE ALERT

Track the internal temperature of your food with the GMG Food Probe.

Set the Food Probe Alert by clicking on the “set” button next to “Food Probe”.

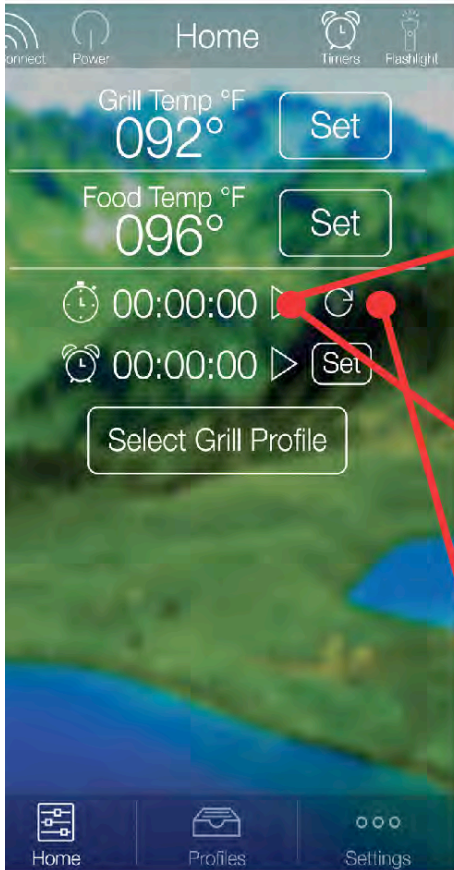

Move the Slider to the desired temperature for you food probe alert.

Now press “Confirm” to set the alert.

The Food probe alert will now trigger an audible alarm on the grill when the set temperature has been reached. If your device is connected it will receive an alert notification as well.

STOPWATCH

Stop watch adjustments can only be made on the home screen.

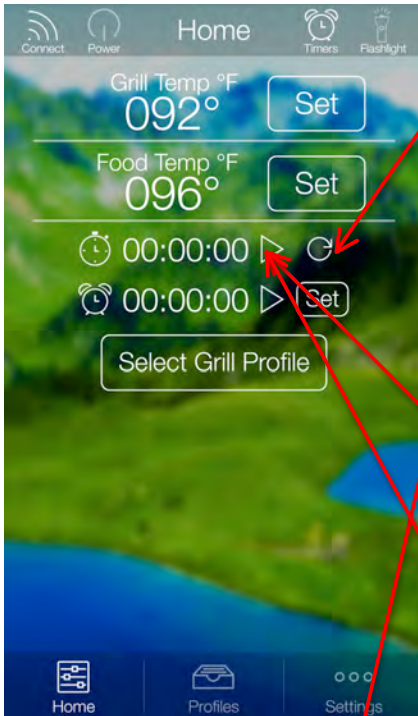

Start the stop watch by pressing the "Play" icon.

To pause the stop watch press the "pause" icon while the stop watch is running

To reset the stop watch to 00:00:00, press the "Reset" icon.

The stop watch is display on the home screen for time tracking for profile building.

TIMER

To set a timer, press "Set" button next to timer.

A timer box will pop up. Select your hours and minutes. Tap "confirm" to set the timer.

Begin the timer by tapping the "play" icon.

To pause press the "Pause" icon while the timer is running.

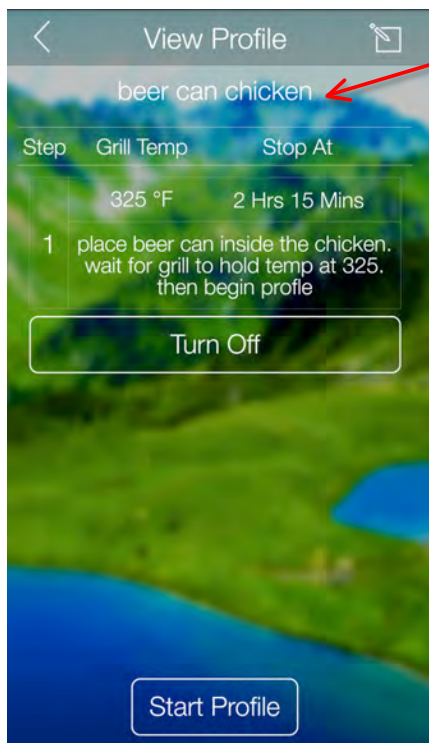

An audible alarm will sound when the timer runs out.

CREATING PROFILES

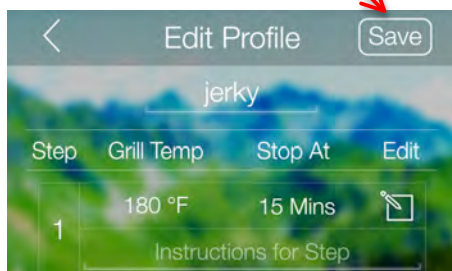

To create a new profile press the "Create Profile" button.

Select "Profile Name" to name your new profile.

Press "Save" to confirm and save your new profile.

CREATING STEPS

Steps allow you to automate temperature changes in a profile. You can select between temperature or time dependent steps. Temperature dependent steps are dictated by the food probe. Time dependent steps use time to dictate the process.

To add a new step press the "Add Step" button.

TIME TRIGGERED:

Each step will maintain a temperature for a specified amount of time. When the selected time has run out, the next step in the profile will activate.

Press "confirm" to save the new profile step.

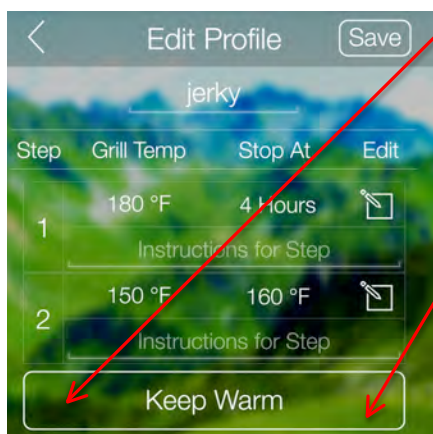

TEMP. TRIGGERED: Using your GMG Food Probe, you can trigger a profile step based on the internal temperature of a food item.

When the food probe reaches the set temperature, the next step in the profile will activate. (i.e. lower or raise grill temp when internal temp is reached.)

Press "confirm" to save the new profile step.

CREATING STEPS

END STEP: For the “End” step the grill will automatically initiate a warm Setting or Turn Off/ Fan Mode.

Keep warm: Setting will set the grill temperature to 150°F and stay there until the grill is turned off.

Turn off: This mode will immediately initiate Fan Mode. (Novice Users are recommended to use the Keep Warm setting)

If your grill goes into fan mode and food is not ready, hold the “Up” arrow on the front of the grill for approximately 5 seconds to bypass “Start Up” Mode.

EDITING PROFILES

To edit, tap the desired profile you wish to edit.

Once open, tap the "Edit" icon.

In Edit Mode, you can:

Add a step by tapping the "add step" button.

Remove a step by tapping "delete".

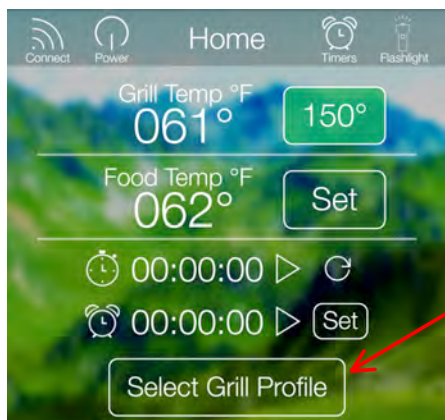

Set the grill temp, stop time, or desire food probe temp.

Adjust the profile to "keep warm" or "turn off" for the end step.

Save all edits by tapping the "Save Icon".

STARTING PROFILES

To begin using the profile you have already created, make sure the grill has already run through the startup process.

Once the grill is warm, press "select grill profile" button.

Select the profile you would like to run.

Press "Start Profile".

"Confirm" on the pop up to complete starting the profile.

Profiles are loaded to the grill's memory and will continue to run if you phone is disconnected.

DELETING PROFILES

To delete a profile, tap the "edit" button in the profile screen.

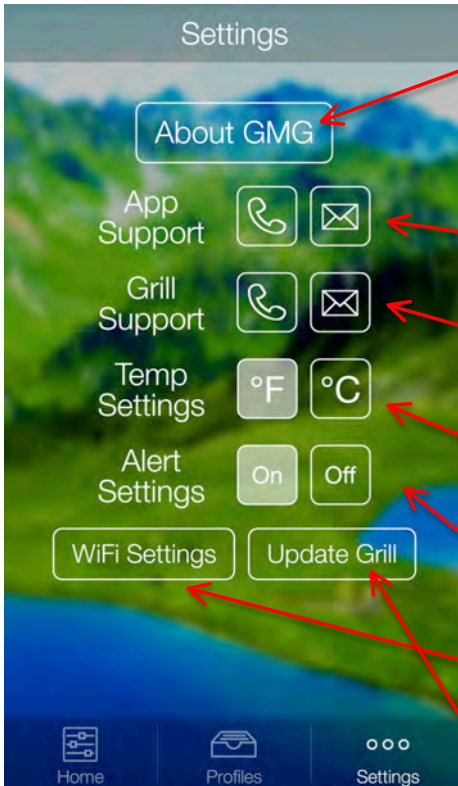

Next you can press the red "Delete" icon to remove the profile.

To move profiles around, hold down the 3 bars next to the profile, then you can arrange them up or down your list.

Make sure to "confirm" when deleting a profile.

SETTINGS SCREEN

About screen link, contact info, missing statement, and app version.

Call or email app support.

Call or email grill support.

Change Temperature settings.

Toggle app notifications.

WiFi network settings.

Update grill firmware system.

FIRMWARE VERSION CHECK

To check what version GMG firmware your grill is running follow these steps.

Toggle the grill off.

Hold down the up button, next toggle the grill on, while continuing to hold the "up" button for about 10 seconds.

The LCD will flash the version number. The newest firmware is v4.8

If no version number is displayed, you will need to update your firmware.

CONTROL BOARD RESET

To reset the system to default settings:

Toggle the grill off.

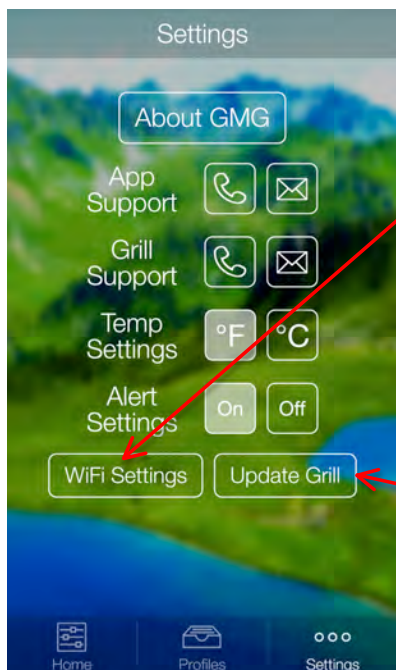

Hold down the "Food" button, next toggle the grill on, while continuing to hold the "Food" button for about 15 seconds.

The grill will count up from 0 to 999, then display off.

The grill is now reset to default.

UPDATING GRILL FIRMWARE

To update your grill's firmware you will need to connect your grill to your home WiFi network and download the update. Firmware updates and application updates are separate. You will need to be at least within 20 feet of your home network. Updating your firmware typically isn't necessary unless you are experiencing an issue with the device.

First make sure the grill is on, and the LCD is displaying "off". Make sure you are not cooking while you attempt the update.

Next select the "update grill" button to begin the update process.

UPDATING GRILL FIRMWARE

First select the network you would like to use to update your grill. The network must have a live network connection.

In the drop down you can select any network the grill is in range of.

Next enter the password for your network and press "confirm". This will begin the update process.

Your grill will turn off it's network and attempt to connect to the local network. It will then begin to download the firmware.

Next your grill's LCD panel will display "UPD" and connect to your local network. Once connected the grill will start downloading the new firmware, at this time LCD will start at "00" and climb to "100". If the update is successful the LCD panel will display "SUC" or "FAL" if it failed. Once you see the "SUC", toggle the grill off then back on.

If your update fails:

1. You are not close enough to your home network, needs to be within 20 feet.
2. You have the latest version of firmware, and the package update does not download.
3. Your network does not have a password or is not compatible with the grill.

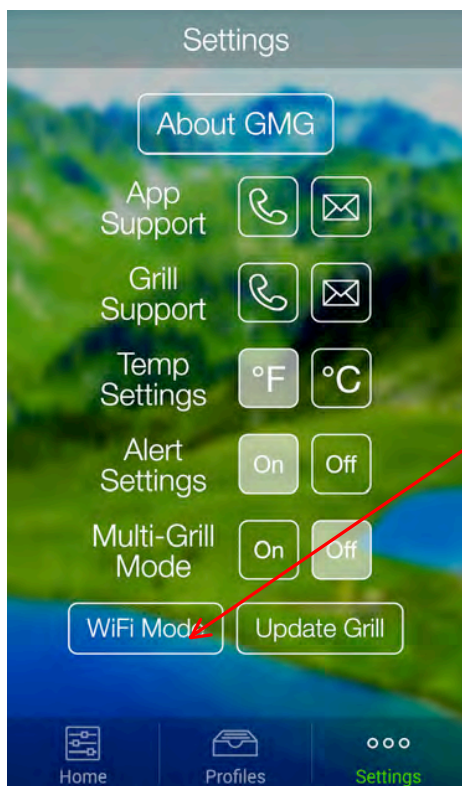

UPDATING GRILL FIRMWARE

After you toggle the grill, the system will install the update and verify it is installed correctly. You will see the grill count from “000” to “100” during this time. When the update is complete the grill will display “OFF”. It will then disconnect from your local network and broadcast via the GMG network again.

CONNECTING TO LOCAL WiFi

Single Grill Mode: Connect to your grill in the default "Point to Point" mode on the GMG network. Make sure the Connect Button is active and the app is reading grill temperatures.

Navigate to Settings tab and select the "WiFi Mode" button.

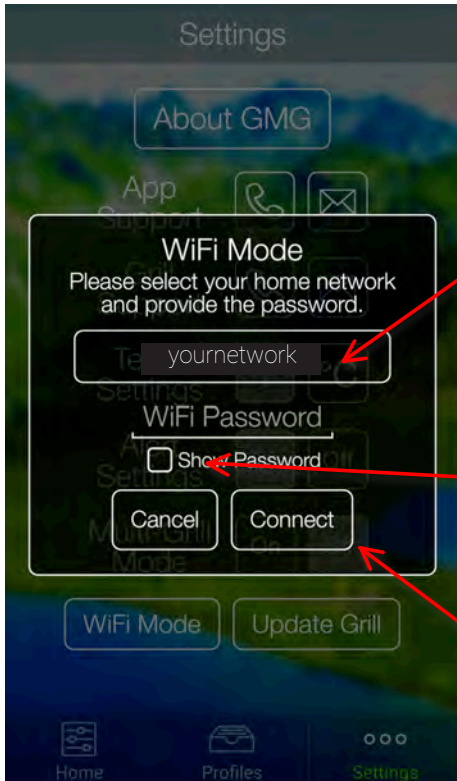

The next steps will connect you GMG grill to your home network.

CONNECTING TO LOCAL WiFi

Android - This dialogue will display every network in range of your device.
iOS - You will have to manually type in your network name (case sensitive).

Select your home network (Hidden and unsecured networks are not supported at this time.) Please be within 20 feet of your home router on the initial update.

Now that the network is selected enter its password.

Now that the network is selected, enter the corresponding password.

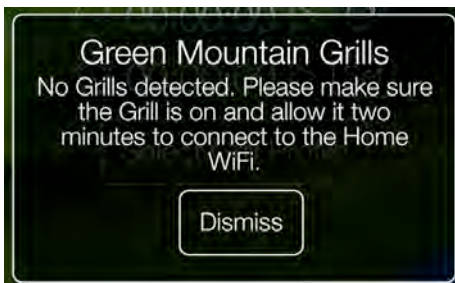

You can select "Show Password" to display the characters (passwords are case sensitive).

The Grill will now connect to your local network using the information provided. The connection process approximately 2 minutes to complete, please be patient. During this phase, the grill is attempting to become a client on the network.

Once the grill is in WiFi Mode, the app should be able to find your grill on the home network each time you turn it on. You will see the “GMG Network” disappear and your device will lose the WiFi connection. Now you just need to connect to the local network in your local phone network settings.

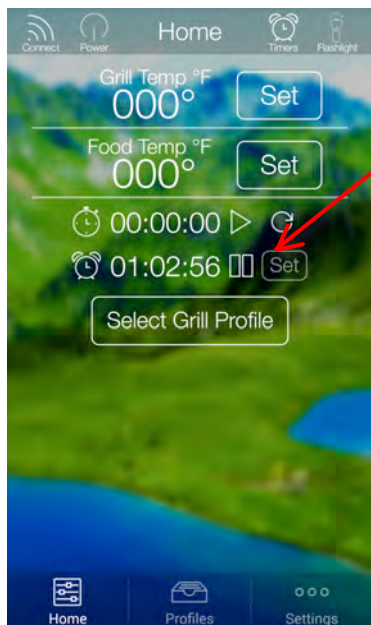

*Please allow the grill two minutes to connect after turning it on or switching it to WiFi Mode.

If you try to connect too early, you may receive a no grills detected message. This means a grill was not found during the searching phase. Please try again, but allow additional time for grills to be found. If you continue to have difficulty connecting, please contact App Support.

CONNECTING TO LOCAL WiFi

After the grill has been connected to your home network, connect your phone or tablet to your home network as well and press the “Connect” button in the App. This process has several steps and will show various windows.

First, it will check for known grills. Since you haven’t connected before, it will not find any. In the future, this will speed up the process of connecting.

Next the app is going to search for grills on the local network, this step will start broadcast mode and wait for a grill response.

Now that the grill is in Broadcast mode, the next step is to switch it to "Client Mode". This step requires the grill to briefly disconnect and reconnect to the router with a new configuration, which takes around a minute.

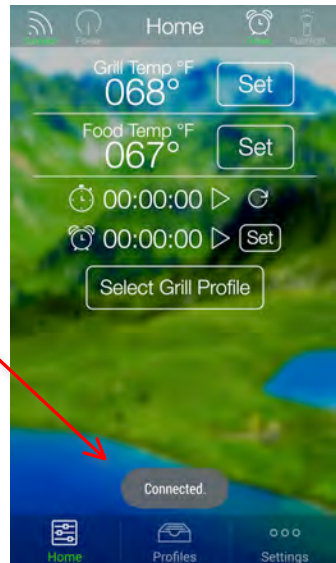

*Note: This step only occurs either the first time you connect, after turning the grill on or after switching it over to a home network for the first time. Future connections will be much faster as long as the grill is left on.

We are almost there, the grill has been detected and the app is now attempting to connect.

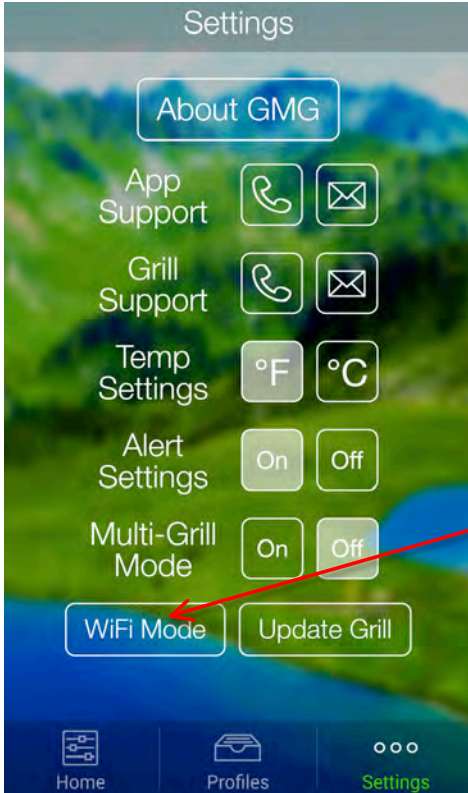

.....

The dialog should disappear and the dialogue will display "Connected" at the bottom of your screen, temperature data should be coming in shortly thereafter.

Congratulations your grill is connected over local WiFi.

MULTI-GRILL MODE

If you have more than one Grill with WiFi, you can control each grill separately. You will need to connect to each grill separately and connect them to your local WiFi following the steps in Single-Grill Mode. Next, follow these steps.

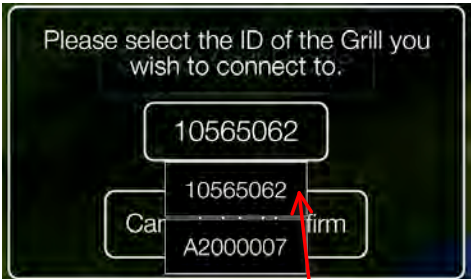

Single-Grill mode connects immediately to the first grill it finds. By default the App starts in Single Grill mode because it is the most common configuration. Multi-Grill Mode extends these steps a little longer than normal to allow it to find every available grill on the network.

After you press Connect in Multi-Grill Mode, the GMG App will search for all available grills on your local network and display them in the drop down. If you would like to switch grills, just disconnect and reconnect by toggling the "Connect" button and you will be able to choose which grill to connect to.

After selecting a grill, press "Confirm" to connect.

Grills are identified by their serial number.
