

Mitre Saw Dust Box

194175-6

For Models: LS0714F /-FL, LS1013L / LS1016L, LS1040FS, LS1214F /-L, LS1216L

Mitre saw dust box uses centrifugal force to create a cyclonic air movement for cleaner more efficient dust collection. Coarse dust is captured by a large primary chamber and fine sawdust is captured by a small secondary chamber. Expelled air is virtually dust free.

A hinged bottom trap door enables dust box to be emptied quickly and easily.

This is an ideal replacement for traditional cloth dust bags.
