

## Shown below are the ways to install AmeriVent Pro-Line Chimney Systems.

Chimney must be enclosed where it passes through occupied spaces to maintain required clearances to combustibles and to protect against damage.

**NOTE:** Outside chimneys are not as desirable, since they are more subject to downdrafts and creosote buildup. An enclosure is highly recommended.

## Installation Clearances as Approved by UL

**NOTE:** Standard 6" and 8" Supports fit between regular 16" O.C. joists. 8PL-ARSA 15" min. opening.
