

ULTRAGREEN™ EXHAUST FANS

Smart. Quiet. Faster installation.

THE PERFECT SOLUTION TO MEET TODAY'S CONTINUOUS VENTILATION REQUIREMENTS.

Built for easy installation, in either new construction or retrofit applications, the **ULTRAGREEN™** Series makes it simple to ventilate any room in the house. In today's tightly built homes, unhealthy pollutants and excess humidity stay trapped inside unless they are mechanically vented away. Exclusive **ULTRASmart™** Motor and Control technology enables fans to maintain their powerful operation- even at high static pressures- and provide required air movement levels for whole-house ventilation, all while meeting spot ventilation needs on demand. Continuous CFM levels can be precisely adjusted to meet the specific needs of each home.

ULTRASmart™ PERFORMANCE

DC Motor and Control Technology monitors performance and adjusts motor speed to ensure rated air movement

- Adjustable continuous ventilation*
- Adjustable run-time at maximum CFM*

ULTRASilent™ SOUND

ULTRASilent™ Sound Technology provides the quietest sound rating available

- HVI certified at < 0.3 Sones
- State-of-the-art blower reduces turbulence

ULTRAQuick™ INSTALLATION

ULTRAGREEN™ fans are engineered to deliver the fastest, easiest and most universal installations

- Expandable mounting frame adjusts to fit any type of joist, I-joist or truss construction
- System works in new construction or room-side retrofit installations

ULTRALucent™ LED TECHNOLOGY

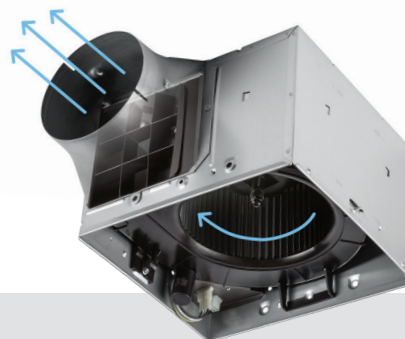

Highly efficient, 18 Watt, integrated LED lighting with even lens diffusion to eliminate hot spots.

- Dimmable LED can be adjusted to illuminate the room or provide a soft night light
- Long-life LEDs last up to 25,000 hours

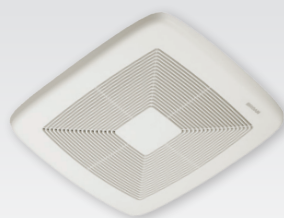

ULTRAGREEN™ Features QSTREAM™ Sound Technology**

QSTREAM™ uses airflow-smoothing baffles to reduce turbulence turning the blower more slowly and quietly without airflow loss.

** Applicable to models XB50, XB80, ZB50 and ZB80.

ULTRAGREEN™ Models

FANS

XB50 ZB80
XB80 ZB110
XB110

LED FAN/LIGHTS

XB80L1

HUMIDITY SENSING FAN

XB110H

MOTION SENSING FAN

ZB80M

ULTRAGREEN™ Project Packs

To simplify installation, Project Packs are ideal for builders and contractors. The Housing Pack is installed first and when drywall work and painting is complete, the fan components needed to finish the job are available as a Finish Pack. Housing Packs and Finish Packs are available as packages of four (4).

HOUSING PACKS

XB000H
XB00H
ZB00H
ZB000H

Housing Pack		Finish Pack		Full Unit Equivalent
XB00H	+	XB50F	=	XB50
XB00H		XB80F		XB80
XB000H		XB110F		XB110
ZB00H		ZB80F		ZB80
ZB000H		ZB110F		ZB110

FINISH PACKS

XB110F
