

Xeri-Bird™ 8 Outlet Emission Device

The Most Flexible and Feature-Rich Multi-Outlet Device on the Market

Xeri-Bird™ is the only multi-outlet emission device on the market with 8 ports that can be configured from 0.5 to 24 gph.

Tailored Watering Solution

Xeri-Bird™ is the only multi-outlet emission device on the market with 8 ports that can be configured from 0.5 to 24 gph using interchangeable emitters or unrestricted flow.

Healthier Plants

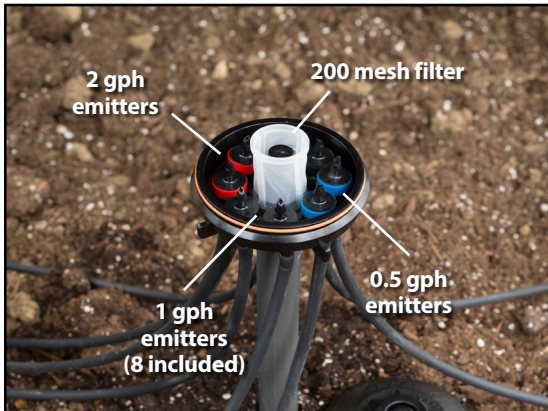

By watering at the root zone, the plants are able to absorb the perfect amount of water just as nature intended. This also reduces foliar disease.

Multiple Applications

Great for small plants, sparsely planted zones, and container plants.

Xeri-Bird™ 8 Outlet Emission Device

Tailored Watering Solution

Each port can be configured on the Xeri-Bird™ by installing flow controlled emitters. The photo to the left shows a combination of 0.5, 1.0, and 2.0 gph Xeri-Bug emitters. For medium flow applications, Rain Bird's PC Modules can also be installed which offers flow rates from 5 to 24 gph. For unrestricted flow, an SPB-025 Barb Transfer Fitting can be installed.

Watering at the Root Zone

Xeri-bird™ allows precise watering at the root zones of plants, trees, and container plants.

Great Solution for Container Plants

Eliminate water waste by direct watering potted plants. The manifold allows for increasing or decreasing future plant requirements.

Always install emitters with the pointed end (inlet barb) or threaded end up, as shown

Use with XQ 1/4" Distribution Tubing; the strongest & most flexible tubing for emitters

Install Rain Bird confidentially with our 3-year trade warranty
